

REMARKS

By the present Preliminary Amendment, the title has been amended to make it consistent with that of the corresponding PCT application, and claim 2 and corresponding portions of the specification have been amended so that the syntax is consistent with the other recitations in the claims without altering the scope thereof. In addition, all multiple dependency has been eliminated from the original claims (with claims 5-9 being canceled without prejudice or disclaimer) and new dependent claims 10-27 have been added to encompass certain aspects of the invention defined in the original multiple dependent claims. It is to be understood that the revisions to the claims are solely for formalistic purposes and not with regard to patentability and that applicants reserve the right to pursue other claims within the scope of the original multiple dependent claims or supported by the specification.

Entry of the instant Preliminary Amendment and favorable consideration on the merits are respectfully requested.

Should the Examiner have any questions concerning the subject application, the Examiner is invited to contact the undersigned attorney at the number provided below.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.
